GIVE A GIFT OF NEURODIVERSITY AFFIRMING RESOURCES

This year, Kind Theory has much to be grateful for.

We have been on a dedicated mission for the past two years, working tirelessly to provide accessible resources to the neurodivergent community. We've been committed, dedicated and passionate. Today, we are extending our gratitude to all our supporters and friends. We couldn't have done it without you! And now, we need YOUR support even more!

Picture a world where you could provide solace to those on a quest to discover the purpose of their lives. Imagine being the catalyst for someone who can finally comprehend and embrace their uniqueness.

This November, we request a gift from all of you for the neurodivergent community. It's a gift of accessible accommodations, resources and assessments for the neurodivergent community.

Your kind donations can help us achieve this!

We want to create a world where everyone feels understood, supported, and empowered.

Your contributions can make a HUGE impact in making this happen! You can help us complete our mission, making a long lasting difference in the lives of those who need it most.

JOYS AND CHALLENGES OF MOVEMENT

BY SWARIT GOPALAN

Many times, light might seem mostly dark when I am not moving. Images and perceptions become clearer and sharper on the move. I sometimes experience joyful hallucinations with a spectacular array of lights. Other times, rapidly lose focus of objects that were clear moments ago.

My body freezes with loud sounds or when I have crippling anxiety about a task that needs me to do something uncomfortable. I struggle to initiate movement when I freeze and need love, patience and very intentional motor coaching to get out of it.

WELCOME TO MY WORLD

In my palace there are no lies
I roam around freely under the blue and grey skies

My cape is my family
They always cheer for me happily

My crown is a hidden treasure
Which many doctors have tried to measure

LATEST ADDITION TO OUR CONTENT CONTRIBUTORS

HASAN AHMED

Meet our new content contributor, Hasan Ahmed, a remarkable 9-year-old boy! Despite his young age, Hasan brings a unique perspective to Kind Theory. His enthusiasm and creativity make our content even more engaging and enjoyable. This is how Hasan introduces himself in his own words:

Call him "H".

"H" likes good people, stories and travel.

"H" can hear.

"H" can listen.

"H" can question.

"H" can learn.

"H" can openly discuss.

"H" can play.

"H" can make mistaking-ly horrible boo-boos.

What works with "H" is some trust, love and laughter.

Next time you see me, try trusting my words. Not my body

We can't wait to see what amazing insights and stories Hasan will share with us in the future.

Welcome to the team, Hasan!
